

To Whom It May Concern

I am pleased to be able to provide this Testimonial in support of John Mills Principal of RF Business Solutions.

John commenced at Ansa Global (previously Inter Security Systems) as the Operations Manager in 2000 and was subsequently promoted to General Manager of the business. He saw the expansion of the business from the largest Western Australian owned electronic security company to a National operation with offices in New South Wales and Victoria with clients operating in all states in mainland Australia.

RF Business Solutions has successfully project managed a number of major installation projects such as the CCTV Surveillance Systems into 150 Volgren buses at Malaga in Western Australia, completed the rollout of 250 Alarm and CCTV systems in a clients premises throughout Australia, has assisted with the negotiation of substantial sales contracts and represented Ansa Global in its dealing with some of its major clients. This in some cases involved resolution of areas of dispute that was done effectively and efficiently while at the same time maintaining a good ongoing relationship with the customer.

John was invited to attend the Company's fortnightly Board meetings and the organisation values his open input into business discussions including restructure proposals. He was also requested to take confidential Minutes of the meetings that he has done efficiently and in a timely manner.

His experience in the security Industry and the contacts he has made over 8 years has been of significant value to Ansa Global Security and the Board is considering way of maintaining its association with RF Business Solutions following its relocation to Tasmania.

I would welcome the opportunity of providing further information on John Mills and RF Business Solutions and invite any prospective client of John's to telephone me on 08 9388 1800 or 0409 787 250.

Yours faithfully
